## GYPFRAME METAL REFERENCE CODES

The first 2 or 3 digits refer to the component width, the letters refer to the component type and the last two numbers indicate metal thickness in mm e.g. 60 S 50 refers to rigidised 60mm Stud 0.50mm gauge or equivalent.

Components with gauge 0.50 or 0.60mm are manufactured using the patented "Ultrasteel" process giving equivalent system performance as systems using metal of gauge 0.55 and 0.70mm respectively.

KEY	COMPONENT	FLANGE DIMENSION mm
S	C Stud	32/34
I	I Stud	38
C	Channel	32
DC	Deep Flange Channel	50
EDC	Extra Deep Flange Channel	70
JC	J Channel	50/70
SC	Starter Channel	32
FC	Fixing Channel 100mm web	10
T	Tabbed	-

## COMPONENT

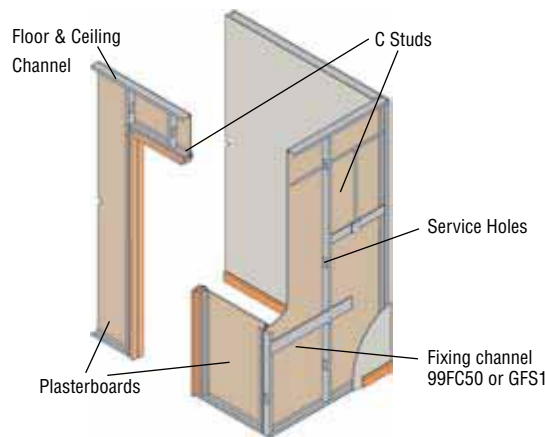

55	= 0.55mm or rigidised equivalent (0.50mm)
70	= 0.70mm or rigidised equivalent (0.60mm)
90	= 0.90 mm or equivalent
12	= 1.2mm or equivalent

## NON-STOCK LENGTHS

Gypframe metal is available in non-stock lengths to special order subject to an extended lead time, a minimum order quantity and a 10% service charge.

## GYPWALL METAL STUD PARTITION

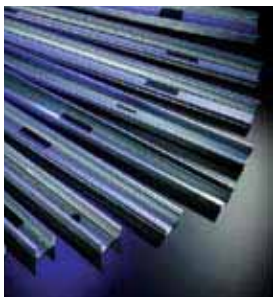

Metal stud partition can be used as a cost effective space divide for all types of commercial, recreational and industrial buildings.
